

Product summary

Granubor® 2

Ideal for bulk blends

Granubor 2 granular borate is a high quality source of boron manufactured specifically for bulk blenders. The particle size, density and durability help ensure uniform distribution in the blend and in the field. Each ton of *Granubor 2* 14.3% boron contains 286 lb of boron. It takes 7 pounds of *Granubor 2* 14.3% boron to equal 1 pound of actual boron.

Fertibor®

Optimum product for suspensions

Fertibor fertilizer borate is a high quality fine crystalline product; an excellent source of boron for suspension fertilizers and for manufacturing ammoniated or granulated fertilizers and micronutrient mixes. *Fertibor* contains 15.0% boron, so each ton of product supplies 300 lb of actual boron.

Solubor®

Product of choice for foliar applications

Solubor soluble borate is a concentrated powder containing 20.5% boron. Its high solubility and rapid dissolution make it ideal for use in foliar sprays or fertigation. *Solubor* can also be used in clear nutrient solutions and with other fluid fertilizers. *Solubor* is very economical and is less than half the cost of solvent-based liquid products, per pound of boron.

Granubor® 2

Typical Analysis

Chemical

Boron (B) 14.3%
 Material required
 for 1 lb of B. 7 lb
 Derived from sodium borates

Physical

SCREEN % CUMULATIVE
 - 4 Trace
 + 12 95

Bulk Density

Loose pack 57 lb per cubic foot
 Tight pack 60 lb per cubic foot
 Angle of repose. 30°
 SGN No. 280

Containers

Granubor 2 is available in bulk, 2500 lb super bags or 50 lb (22.7 kg) plastic bags.

Fertibor®

Typical Analysis

Chemical

Boron (B) 15.0%
 Material required
 for 1 lb of B. 6.7 lb
 Derived from sodium borates

Physical

SCREEN % CUMULATIVE
 8. Trace
 200 98

Bulk Density

Loose pack 63 lbs. per cubic foot
 Tight pack. 71 lbs. per cubic foot

Containers

Fertibor is available in bulk, 2500 lb super bags or 50 lb (22.7 kg) plastic bags.

Solubor®

Typical Analysis

Chemical

Boron (B) 20.5%
 Material required
 for 1 lb of B 4.9 lb
 Derived from sodium borates

Solubility in Water

Temp (°F)	Lb <i>Solubor</i> p/gal water	Lb B p/gal water	B conc.
32	0.2	0.04	0.5%
50	0.4	0.18	2.0%
68	0.9	0.47	4.4%
86	2.3	0.47	4.4%
104	3.2	0.66	5.7%

Physical

SCREEN % CUMULATIVE
 + 200 8
 - 200 92

Bulk Density

Loose pack 25 lb per cubic foot
 Tight pack. 35 lb per cubic foot

Containers

Solubor is available in 1700 lb super bags, and in 50 lb (22.7 kg) multiwall paper bags with a polyethylene moisture resistant barrier.
