

Boron in alfalfa

Study details

Research institution: University of Wisconsin

Date: 2020-2021 growing seasons

Location: Northwestern Wisconsin, United States

Soil: Clayey. 0.2 ppm B in 2020, 0.4 ppm B in 2021

Fertilizer: *Granubor*® (0, 0.45, 0.9, and 2.7 kg lb/acre)

Trial design: Randomized complete block with three repetitions

Results

Granubor showed a better performance than the control at all rates even though not statistically different.

Alfalfa DM yield (lb/acre) | 2020

Alfalfa DM yield (lb/acre) | 2021
